How Host Family Stipends are Calculated for Full Year High School Students

- Each host family is given a stipend amount at an agreed monthly rate based for their area, school, number of meals, and transportation provided.
- The monthly stipend is based on a 10 month academic school year cycle (42 weeks). Because each month has a different number of days - the stipend has been calculated using a weekly rate which can also be broken down into a daily rate. For example:

If the stipend is \$1200,

10 months x \$1200 = \$12000 for the academic school year

$\$12000 / 42 \text{ weeks} = \285.71

Hosts are paid for 14 days (2 weeks) in each instalment.

$\$285.71 \times 2 \text{ weeks} = \571.42

- Here is a chart for your convenience:
